LINEAR INTEGRATED CIRCUIT

5A ADJUSTABLE/FIXED LOW DROPOUT LINEAR REGULATOR

■ DESCRIPTION

The UTC **UZ1084-ADJ**/Fixed voltages are low dropout three-terminal regulators with 5A output current capability. These devices have been optimized for low voltage applications including VTT bus termination, where transient response and minimum input voltage are critical.

On-chip thermal limiting provides protection against any combination of overload and ambient temperature that would create excessive junction temperatures.

■ FEATURES

- *Fast transient response
- *Low dropout Voltage at up to 5A
- *Load regulation : 0.5% typical
- *On-chip thermal limiting

■ APPLICATIONS

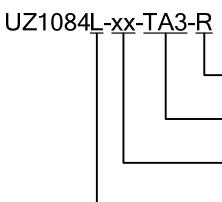

- *Desktop PCs, RISC and embedded processors' supply
- *GTI, SSTL logic reference bus supply
- *Low voltage V_{CC} logic supply
- *Battery-powered circuitry
- *Post regulator for switching supply
- *Cable and ADSL modems' DSP core supply
- *Set Top Boxes and Web Boxes modules' supply

	AD:ADJ	<p>The marking diagram shows a top-down view of a component with three pins labeled 1, 2, and 3. Above the component, the text 'UTC' and 'UZ1084' are printed, with a small square box between them. Below this, there are two rows of small squares. The first row has two squares under pin 1, one square under pin 2, and three squares under pin 3. The second row has two squares under pin 1, one square under pin 2, and two squares under pin 3. Arrows point from the text 'LOT Code' to the first square in the first row under pin 1, and from 'Voltage Code' to the first square in the second row under pin 1. Arrows also point from 'Date Code' to the last square in the second row under pin 3, and from 'G: Halogen Free' to the last square in the first row under pin 3. A legend on the right indicates 'L: Lead Free' with a blue arrow pointing left, and 'G: Halogen Free' with a red arrow pointing right.</p>
